PROFILE

Final-year Computer Science student with hands-on experience building React applications, including a full jewellery e-commerce frontend and a personal portfolio site. Comfortable with HTML, CSS, JavaScript, React, and Tailwind CSS, with a practical, project-driven approach to learning. Seeking a frontend development internship to apply and grow these skills in a real-world team environment.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript

Frameworks & Libraries: React.js

Tools: Git, GitHub, Vite, VS Code

Concepts: Responsive design

Styling: Tailwind CSS (basic knowledge)

PROJECTS

AURA — AI-Powered Jewellery E-commerce Frontend

Responsive e-commerce frontend for a jewellery brand built with React & Vite, featuring product filtering/search, cart management via Context API, and user authentication UI.

- Built a dynamic product catalog with category-based filtering (earrings, necklaces, etc.) and ratings/pricing display
- Implemented client-side routing (React Router) across Home, Login, and Register pages
- Developed reusable component architecture (Navbar, Hero, Orbit, About, Reviews, Footer) with custom CSS styling
- Designed UI/UX for an AI-styled jewellery brand ("AURA") targeting the Nepal market

Personal Portfolio Website

- Designed and developed a personal portfolio site with sections for About, Projects, Education, and Contact, using a dark theme with purple/violet gradient accents.
- Solved real-world responsive design challenges including flexbox layout issues, media query breakpoints, and gradient text effects.
- Built with React 19 and Vite for fast development and optimized builds.

EDUCATION

Bachelor in Computer Science and Information Technology (BSc. CSIT)

Nepathya College, Tribhuvan University — 8th Semester (Final Year)

EXPERIENCE

No formal work experience yet — actively seeking a frontend internship to gain hands-on industry experience.
